Iluka Resources Limited - Balranald Mineral Sands Mine
Quarterly Regional Groundwater Levels 2026

The results of the quarterly regional groundwater level monitoring undertaken in accordance with NSW Environment Protection Licence (EPL) 20795 and Table 24 of the *Balranald Mineral Sands Mine Water Management Plan* (Version 5) are tabulated below in Table 1. Figure 1 illustrates groundwater level trends from third Quarter 2023 to second Quarter 2026.

The second Quarter 2026 monitoring event was originally scheduled for June 2026; however, monitoring could not be undertaken at that time due to inaccessible road conditions preventing safe access to the monitoring bores. Monitoring was subsequently completed in July 2026 once road conditions had improved sufficiently to allow safe access to the area.

Table 1 - Quarterly regional groundwater monitoring depth levels for 2026

Relevant EPL Point ID	Monitoring Bore Name	Depth (metres below TOC)			
		1Q Mar 2026	2Q June (July) 2026	3Q Sept 2026	4Q Dec 2026
19	**GW036673(1)**	14.97	16.04		
20	**GW036866(1)**	11.96	11.87		
21	**WB01**	18.89	18.7		
22	**WB02**	18.02	17.88		
23	**LPSPB03**	13.50	12.9		
-	**GW036866(2)**	11.58	11.47
